

Message from the Mayor
October 2014 City Chatter Newsletter

With the reading of the water meters, we are set to move forward with repairs to the City's infrastructure, & this process has begun. You should start to see activities in our streets within the next couple of months. With the savings from those repairs, we will be able to make more repairs.

I would like to send a special thank you to Representative Outten, Representative Wilson, Senator Simpson, & Commissioner Howell for all they have done for this City & the people who live here, such as the new floor in HPR, all the street work, & many other things that we take for granted.

In closing, from myself, Council, and the employees of the City, I hope your holidays are all that you wish for.

- Mayor Anthony R. Moyer
