Category A | Final Plan—Review Process

§440-289C Category A Final Plan Review Procedures

The purpose of the final stage is to ensure that all submittal requirements of final site plans as set forth in §440-289 are specifically and accurately addressed, to ensure that all conditions of the Planning Commission's recommendations and City Council's approval are specifically and accurately met and to finalize any and all necessary formal agreements related to the project, which may include public works agreements and easement agreements, among others.

- (1) Final site plan approval shall be granted prior to the commencement of any development activity.
- (2) Final site plans shall be submitted to the City Manager, who shall review the plans for compliance with these regulations and the conditions, if any, of Planning Commission approval. If specified conditions or stipulations are met in revised plans, the City Manager shall approve issuance of zoning compliance certificates in accord with the revision without returning the plans for further Planning Commission review.
- (3) When all review and approvals have been completed and documentation of such approvals provided to the City Manager, he/she shall sign the site plan to indicate completion of review and approval by the City and to certify that conditions, if any, of site plan approval have been met. The applicant shall submit all local, county, state, and/or federal approvals as may be required. No permit shall be issued until this approval has been given.
- (4) When a public works agreement is required, the City Manager may not certify final approval of a site plan until that public works agreement has been executed by the applicant and the City.

The City Manager shall assure that the project is completed in conformance with the approved site plan before issuing a certificate of occupancy.
